NON SOLO COLLEZIONI

Il punto di forza della nostra azienda è il **"Prodotto La Torre"** inteso come *idea, progetto, sviluppo, realizzazione, servizio, assistenza...* un pensiero quindi che esprime il "Mondo La Torre".

NOT ONLY COLLECTIONS

Our strength is the **"La Torre Product"** made of *ideas, projects, development, realization, service, commitment...* a working philosophy expressing the "La Torre World".

PAS SEULEMENT DES COLLECTIONS

Notre force particulière est le **"Produit La Torre"** consistant de *idée, projet, développement, réalisation, service, engagement...* une façon de travailler qui exprime "Le Monde La Torre".

by

PERCHÈ LA TORRE

- ✓ Affidabilità: dal 1960
- ✓ 100% Made in Italy
- ✓ Approccio green
- ✓ Qualità certificata secondo gli standard internazionali
- ✓ Processo di produzione controllato
- ✓ Flessibilità
- ✓ Esperienze internazionali consolidate
- ✓ Ampia gamma/varietà
- ✓ Tocco italiano nelle relazioni personali
- ✓ Bello e possibile: perfetto rapporto Qualità-Prezzo

WHY LA TORRE

- ✓ Reliability: since 1960
- ✓ 100% Made in Italy
- ✓ Green approach
- ✓ Quality certified according international standard
- ✓ Full controlled production process
- ✓ Flexibility
- ✓ Consolidated international experiences
- ✓ Wide range
- ✓ Italian touch in personal relationship
- ✓ Beautiful and possible: perfect Ratio Quality-Price

POURQUOI LA TORRE

- ✓ *Confiance: depuis 1960*
- ✓ *100% fabriqué en Italie*
- ✓ *Approche écologique*
- ✓ *Qualité certifiée selon les normes internationales*
- ✓ *procès de production contrôlé*
- ✓ *flexibilité*
- ✓ *Expériences internationales consolidées*
- ✓ *Vaste gamme/varietà*
- ✓ *Savoir-faire italien dans les relations personnelles*
- ✓ *Beau et possible: parfait rapport Qualité-Prix*

SCATOLA INCASSO-DOCCIA UNIVERSALE
 CONCEALED SHOWER BOX, ONE-FITS-ALL
 BOÎTE A ENCASTRE POUR MITIGEURS
 DOUCHE

Un box incasso universale per una installazione sicura e semplice e che permette di rimandare la scelta della combinazione doccia al momento del completamento del bagno e che garantisce tenuta stagna in caso di perdite o sostituzioni di linee nel tempo.

A universal box for concealed shower mixers of LA TORRE production, for easy and safe installation procedure, line and shower combination can be decided upon at the completion of the bathroom, additionally, the box gives watertight protection should anything happen to the valve.

Un boîte à encastrer universel pour une installation en sécurité et simple qui vous permet de renvoyer le choix de la combinaison de douche au moment de l'achèvement de la salle de bain et qui garantit l'imperméabilité en cas de fuites ou de remplacements de lignes dans le temps.

VANTAGGI:

- ✓ INCASSO UNICO
- ✓ FACILE INSTALLAZIONE
- ✓ BOX A TENUTA D'ACQUA
- ✓ ADATTO A TUTTI I TIPI DI PARETE
- ✓ RIDOTTA PROFONDITÀ

ADVANTAGES:

- ✓ ONE FITS ALL SOLUTION
- ✓ EASY INSTALLATION
- ✓ WATERTIGHT
- ✓ SUITABLE FOR ALL WALL KINDS
- ✓ REDUCED RECESS NEEDED

AVANTAGES:

- ✓ SOLUTION UNIVERSELLE
- ✓ FACILE A INSTALLER
- ✓ BOÎTE ETANCHE
- ✓ CONVIENT A TOUS LES TYPES DE MURS
- ✓ PROFONDEUR REDUITE

réalisent dans notre firme" (cit.)*

Anna e Massimo Latorraca

ITA

Gli inizi dell'attività si collocano nel lontano **1921**, quando il bisnonno materno di Massimo e Anna Latorraca, gli attuali amministratori, fonda la sua prima società a Pogno, tra Valsesia e Lago d'Orta, nel cuore storico del distretto piemontese dell'acqua.

Da allora azienda e famiglie si intrecciano fino al **1960 quando Giuseppe Latorraca fonda la Rubinetteria La Torre**, che piano piano si distinguerà per qualità e originalità dei prodotti durante i 55 anni di attività.

Dal 1994 con Massimo ed Anna, l'azienda del novarese diffonde in scala globale i pensieri e i prodotti creati dalla nuova sede di Inverio.

ENG

The beginnings go as far back as 1921, when the maternal great-grandfather of Massimo and Anna Latorraca, the current owners, founded his first company in Pogno. A small village between Valsesia and Lago d'Orta, in the heart of the historic Piedmont water district. Since then the Company and family life have been intertwined. **In 1960 Giuseppe Latorraca founded La Torre**, which would gradually distinguish itself for quality and originality of the products during the 55 years of activity.

In 1994 La Torre moves to Inverio and with Massimo and Anna joining their father, the company expands and finds great overseas opportunities to distribute its products.

FR

Les débuts se situent en 1921, quand le grand-père maternel de Massimo et Anna Latorraca, les administrateurs actuels, fonde sa première entreprise à Pogno, entre Valsesia et le lac d'Orta, dans la région historique de l'eau. En suite la vie de la société et de la famille ont été étroitement liés. **En 1960 Giuseppe Latorraca a fondé la robinetterie La Torre**, qui se caractérise pour la qualité et l'originalité des produits pendant les 55 ans d'activité. Depuis 1994, avec Massimo et Anna, la société connaît une forte expansion à l'extérieur.

LA TORRE NASCE QUI

ITA

Inverio, comune Novarese e cuore verde tra due laghi, Maggiore e d'Orta. Luogo della cultura legata all'acqua sempre inserito nel più importante bacino nazionale ed internazionale dedicato alla produzione della rubinetteria e con una ottima posizione logistica.

Piemontese, prima ancora che italiana, **La Torre nasce** proprio qui: in un contesto speciale immerso nel verde e tra laghi di montagna, **dove l'acqua è da sempre protagonista.**

ENG

Inverio, small town in the Novara province and green heart between two lakes (Maggiore and Orta). its culture linked to water and inserted in the most important national and international district dedicated to the production of taps and a great logistic location.

La Torre was born in this special context of countryside and mountain lakes, **where water is always a leitmotif.**

FR

*Inverio, Novara et le cœur vert entre les deux lacs Majeur et d'Orta. Une culture liée à l'eau dans une région typiquement dédiée à la production de robinets et une favorable logistique, **La Torre est née ici:** dans un contexte particulier de vert, lacs et montagnes, **où l'eau est toujours protagoniste.***

LA NOSTRA AZIENDA

ITA

La nostra azienda attualmente si sviluppa in un complesso di strutture che occupano **circa 10.000 metri quadri coperti**; la localizzazione (a 800 m dall'autostrada per Milano- Torino-Genova) tuttavia ci permette, grazie alla superficie a nostra disposizione (**30.000mq**) di espandere ulteriormente gli stabili e garantire una **grande flessibilità produttiva**.

Per quanto riguarda la produzione, La Torre si focalizza sulla passione e la volontà di raggiungere e mantenere i migliori standard da offrire al mondo, soluzioni estetiche e funzionali di elementi di rubinetteria unici, che soddisfino i bisogni della quotidianità e rispettino il mondo stesso dal quale provengono le materie prime che li compongono. Vivere giorno dopo giorno in modo positivo e migliore in armonia con la natura.

Trattiamo e lavoriamo il metallo per dare vita a una vasta gamma di collezioni che soddisfino in modo totale le aree di gusto, a partire da uno stile essenziale ad uno più raffinato o complesso.

Sfruttiamo alcune tra le più **innovative ed avanzate tecnologie** per garantire ai nostri clienti il piacere di utilizzare i nostri prodotti, per trasformare in esperienza il momento in cui viene utilizzata la nostra rubinetteria.

ENG

Our company currently occupies a **complex of buildings of about 10,000 square meters** (800 m from the motorway to Milan - Torino - Genoa). And thanks to **30,000 square meters industrial land** at our disposal we could further expand the production units for a **great production flexibility**.

As for the production, La Torre focuses on achieving and maintaining the highest standards to offer aesthetic and functional solutions and unique fitting elements, which meet the needs of everyday life and respect the Earth that provides the raw materials that compose our products.

We believe in living day after day in a positive way and in harmony with Nature.

We work to create a wide range of collections that may satisfy a great variety of tastes, from linear simple styles to more sophisticated or complex models.

We use some of the **most advanced technologies** to ensure our customers the pleasure of using our products, and make it always a nice experience.

FR

Notre société occupe actuellement des **structures d'environ 10.000 mètres carrés couverts**; situé à 800 m de l'autoroute pour Milan-Turin -Gênes. Grâce à la surface à notre disposition (**30.000 mètres carrés**) on peut augmenter avec aise notre **capacité de production**.

Quant au produits, La Torre se focalise sur les moyens pour atteindre et maintenir niveaux de qualité les plus élevées, esthétique raffinée et solutions fonctionnelles qui répondent aux besoins de la vie quotidienne. Nous traitons et nous travaillons le métal pour créer un large éventail de collections qui répondent à plusieurs goûts appliquant **technologie d'innovation** pour assurer à nos clients le plaisir d'utiliser nos produits.

UNA SCELTA ECOLOGICA

ITA

Nel 2001 La Torre è stata la **prima rubinetteria** in Italia con le due certificazioni **ISO 14001** e **ISO 9001**.

Il poter contribuire, nel nostro piccolo, al miglioramento della vita delle persone è una grande soddisfazione se non un privilegio per l'azienda.

Puntiamo sempre ad offrire alti standard di qualità e mantenere sempre aperto il dialogo tra innovazione e natura, nell'interesse diretto dei nostri clienti.

Valorizzare la **scelta ecologica** quindi è una vera e propria forma di educazione e cultura che si traduce nella volontà di migliorarsi, di cambiare, di rivoluzionare ciò che ci circonda partendo dai più piccoli e semplici gesti quotidiani. Per questo le nostre scelte si sono direzionate su due ambiti precisi: l'installazione di **pannelli solari** su tutta la superficie aziendale nel 2011 e l'utilizzo di **materie prime** impiegate da La Torre che rispondono alle certificazioni internazionali più severe finalizzate al tutelare il consumatore, quali le regole americane riguardanti il divieto di utilizzo del piombo nella produzione o quelle australiane che disciplinano la cessione dello zinco e naturalmente quelle europee, molto attente alla cessione di nichel. Per dare il massimo dell'informazione al consumatore finale, La Torre adotterà lo schema di etichettatura volontaria europea **"WATER LABEL"**: un facile schema di lettura in cui l'etichetta mostra in modo chiaro il consumo di acqua massimo del prodotto.

ENG

Being able to contribute even in a small way to the improvement of people's lives is a great satisfaction if not a privilege for the company.

We always aim at offering high quality standards and a good balance between innovation and nature.

the real **ecological attitude** is a way of thinking that shows when the desire of guarding and improving our surroundings translates into actions. So far our most relevant steps in this direction have been:

- the installation of **solar panels** on the whole area of the holding in 2011.
- the use of **raw materials** that meet the strictest international certifications aimed at protecting the consumer, for example American rules relating to the content of lead in the production or Australian regulations regarding zinc and of course the European ones, focussing more on the content of nickel. To give the users as many useful informations as possible, we have joined a voluntary certification program called **"WATER LABEL"** labelling each registered product according to its water consumption. an easy to ready diagram showing the maximum flow of the item.

FR

*Pouvoir contribuer soit pour peut, à l'amélioration de la vie des gens est une grande satisfaction, sinon un privilège pour la société. Nous cherchons toujours à offrir des niveaux élevés de qualité et de maintenir un équilibre entre l'innovation et la nature, dans l'intérêt direct de nos clients. Notre **culture écologique** et le désir d'améliorer notre environnement nous cherchons le rendre pratique et réel en commençant par les plus petits gestes quotidiens et simples masi aussi avec des choix structurales:*

- l'installation de **panneaux solaires** sur toute la superficie couverte en 2011

- l'utilisation des **matières premières** qui répondent aux strictes certifications internationales visant à protéger le consommateur, tels que les règles Américaine concernant l'interdiction de l'utilisation du plomb dans la production ou les australiennes qui se réfèrent au zinc et bien sûr celles de l'Europe, très attentives à la présence de nickel. Afin de fournir aux utilisateurs plus d'informations sur nos produits, nous avons adhérer à un programme volontaire de certification **"WATER LABEL"** selon lequel il y aura une étiquette indicative du débit maximum pour chaque produit enregistré.

NON SOLO COLLEZIONI

ITA

Il punto di forza della nostra azienda è il "Prodotto La Torre" inteso non solo come singolo oggetto o collezione, ma inteso come idea, progetto, sviluppo, realizzazione, servizio, assistenza... un pensiero quindi che esprime il "Mondo La Torre" nella sua totalità. Un'intera filiera che parte dalla **progettazione** alla **realizzazione** della collezione, dalla messa a punto del processo produttivo fino al servizio **vendita** e **post vendita** garantendo al cliente, continuità, qualità ed esclusività; un ciclo di vita seguito con estrema attenzione e dedizione in tutte le sue fasi che lo compongono.

Ciascun prodotto vuole essere non solo un elemento fine a se stesso, ma un'idea concreta fatta di valori che nascono della nostra azienda, come il **gusto "Made in Italy"** che da sempre ci contraddistingue.

La produzione si declina in una vasta gamma di tipologie: differenziazione delle forme e degli stili ci garantiscono uno spazio sul panorama del mercato globale, permettendoci di rispondere alla grande richiesta e alla varietà di gusti dei consumatori. Offriamo infatti collezioni più moderne e dalla linea "pulita" ed altre dal design più classico.

La Torre ha sviluppato una grande varietà di articoli, la sala bagno e la cucina divengono gli indiscussi protagonisti di uno stile di vita in perfetta armonia con la natura;

stile che incarna il moderno concept alla base del quale sono posti in primo piano il benessere, il miglioramento della qualità della vita, l'energia e la dinamicità del design al quale aderiamo totalmente.

Nel nostro piccolo siamo anche responsabili di un certo impatto ambientale, motivo per cui tutti i materiali impiegati nella produzione rispecchiano le più severe normative vigenti e riguardanti parametri che assicurano standard sanitari ed ecologici.

I rubinetti La Torre GREEN sono frutto di una profonda conoscenza sviluppata negli anni, e costituiscono un innegabile passo avanti in ambito tecnologico, sanitario, ecosostenibile e della sicurezza dell'acqua; un cambiamento accessibile a chiunque sia pronto a proiettarsi verso uno stile di vita sano ed equilibrato.

Utilizziamo materie prime quali: **ottone a basso contenuto di piombo** (norme Americane) o **senza cessione di zinco** (norme Australiane e Sudafricane) e **a basso contenuto di nichel** (norme Europee). Tutti gli accessori e componenti sono certificati per uso alimentare secondo le diverse norme nazionali.

Il rivestimento nichel cromo

è realizzato dalla azienda del nostro gruppo **"GREENPLATING"**, certificata anch'essa ISO 9001 e ISO 14001, quindi con sistema di gestione ambientale certificato.

Il rispetto per l'ambiente attraverso i prodotti si ottiene anche con l'utilizzo di aeratori che limitano l'erogazione secondo gli standard previsti dalle best practices mondiali. Tale semplice sistema permette una facilissima manutenzione da parte di qualsiasi utilizzatore. Attenti anche nel packaging, l'imballaggio dei nostri prodotti è riciclato al 100%; tale decisione è la risposta ad un mercato sempre più orientato verso scelte di consumo etiche e responsabili.

Tutto questo è il nostro mondo La Torre.

ENG

The strength of our company is the la torre product, meaning not only the final item or collection but a whole made of the original idea, the **project**, the actual **creation** and then the **distributuion and service** to our customers. The complete process that make our everyday job and our world, this is the "product" we offer and we take our utmost care at every step. Each piece, then, is intended not only as a functional element, but also as the realization of an idea that matches with and enhances the

identity of its location as in the **best tradition of Made in Italy**. Once our products have been selected and purchased, customers are not left to themselves, but supported by a competent after-sale service.

We always aim at 100% customer satisfaction through flexibility, rapid response and fair relationship.

A wide range of products with different forms and styles enables us to find our space on the global market and meet the demand and the variety of consumer tastes.

From the classic design models up to the latest collections of contemporary design, LA TORRE has developed a wide variety of articles.

The bathroom and the kitchen become the elected spaces dedicated to our well being in harmony with nature, a private expression of the modern concept of life based on improving welfare and quality of life in full respect of the environment.

Being aware that in a small way we are still responsible for some environmental impact, we do our best to select the materials used in production respecting the regulations and related parameters that ensure good sanitary and ecological standards: the raw materials are **low-lead brass** (American standards) or **without zinc** (Australian and South African standards) or **low-nickel** (European standards). All accessories and components are certified for food according to different national standards.

The coating is made from nickel chromium group company

"GREENPLATING", which is also certified ISO 9001 and ISO 14001 (environmental management system certificate).

Water saving is obtained mainly through the use of aerators that restrict the flow rate to the standard required by international rules. This simple system allows also a very easy maintenance by the users.

The packaging of our products is 100% recycled; this decision is a response to the market increasing focus on ethical and responsible choices.

FR

Notre force est le "produit La Torre", pas seulement un objet ou une collection unique, mais l'ensemble de l'idée, de la conception, du développement, de la mise en œuvre, du service aux clients, tout ce qui constitue le MONDE LA TORRE dans tous ses éléments. Une chaîne qui se déroule de la **conception** à la **réalisation** de la collection, de l'élaboration du processus de production jusqu'à la **vente** et de **service après-vente** garantissant au client, la continuité, la qualité et l'exclusivité; un cycle de vie a suivi avec un soin particulier.

La salle de bains et la cuisine deviennent protagonistes du style de vie moderne conjugant bien-être personnel et amélioration de la qualité de vie avec respect pour la nature.

Dans notre petit nous sommes aussi responsables de certains impacts sur l'environnement, pour limiter ça le plus que possible toutes les matières utilisées dans la production sont conformes aux règles en vigueur et aux paramètres qui garantissent santé et environnement.

Les collections GREEN sont le résultat d'une profonde connaissance

Chaque produit représente une idée concrète faite de valeurs qui sont nées de notre société, et le **goût "Made in Italy"** qui nous a toujours distingués.

La variété et richesse de notre gamme nous permet de trouver un place dans un panorama global très compétitif.

développé au cours du temps et une application positive des progrès dans la technologie, un changement accessible à quiconque pour une vie plus saine et équilibrée.

Nous utilisons des matières premières telles que le **laiton sans relache de plomb** (normes américaines) ou **sans relache de zinc** (les normes australiennes et sud-africaines) ou **basse teneur en nickel** (normes européennes). Tous les accessoires et composants sont certifiés selon différentes normes.

Les traitements galvaniques se réalisent chez société du groupe "GREENPLATING", qui est également certifié ISO 9001 et ISO 14001, et avec le certificat de système de gestion de l'environnement!

On vend des produits à consommation contrôlée de l'eau principalement grâce à l'utilisation d'aérateurs qui restreignent le flux selon les différents

normes internationales. Attention aussi à l'emballage de nos produits. Ils sont 100% recyclés; cette décision est une réponse à un marché fait de consommateurs aux choix éthiques et responsables. Tout cela est notre monde La Torre.

LE NOSTRE CERTIFICAZIONI

ITA

A rispecchiare e garantire i valori che ci contraddistinguono sono le numerose certificazioni che La Torre ha ottenuto negli anni, tra cui:

ENG

Many International approvals and certifications obtained through the years are proof of the application of our values and principles in our work:

FR

Nos certifications à témoigner notre engagement vers qualité et écologie, plusieurs sont les certifications que La Torre a obtenu pendant les ans, y compris:

ISO 9001

Certificato ciclo produttivo l'80% di esso nella nostra fabbrica. 20% in outsourcing a livello locale. Prima Qualità del materiale.

Componenti certificati e rivestimenti per prodotti più sicuri e più sani.

Production cycle certified as 80% in-house and only 20% outsourced locally.

First quality material.

Certified and health safe components.

Cycle de production de 80% dans notre usine, 20% externalisée localement.

Matériel de première qualité.

Composants et revêtements certifiés.

ISO 14001

APPROCCIO GREEN
detenuto nel 2001 da T.Ü.V. per certificare
eco-compatibili i processi, gli atteggiamenti
e la politica.

APPROCCIO GREEN
Green approach.

process ECO-FRIENDLY.

APPROCHE VERT
détenue en 2001 par T.Ü.V. pour certifier
les processus, les attitudes
et la politique écologiques.

ITA

Nel 2015 abbiamo ottenuto il **certificato OQC (ORIGINE e QUALITA' CONTROLLATA)**, rilasciato dalla NSF International, (primario ente americano di certificazione riconosciuto a livello mondiale), certificato che garantisce non solo l'origine dei prodotti (made in Italy) ma il fatto che gli stessi sono certificati secondo norme internazionali che attestano alti standard qualitativi.

ENG

In 2015 we obtained the **OQC certificate (CONTROLLED ORIGIN AND QUALITY)**, issued by NSF International (worldwide recognized certification institute), which guarantees not only the origin of the products (made in Italy), but the fact that they are certified according to international quality standards.

FR

En 2015, nous avons obtenu le **certificat OQC (origine et la qualité «contrôlée»)**, délivré par NSF International (principale institution de certification américaine reconnue dans le monde entier), le certificat qui garantit non seulement l'origine des produits (fabriqué en Italie), mais le fait qu'ils sont certifiés selon les normes internationales qui attestent à un niveau élevé.

INTERNATIONAL APPROVALS

La Torre è dunque un'azienda dinamica che vende nei 5 continenti con canali distributivi diversificati ottenendo certificazioni internazionali.

La Torre is a dynamic reality active in the 5 continents in various ways and with several specific approvals.

La Torre est donc une entreprise dynamique qui vend sur les 5 continents avec des canaux de distribution diversifiés avec le support de certifications internationales.

AWARDS

LA TORRE NEL MONDO

ITA

Ogni anno ci impegnano ad organizzare un calendario fitto d'impegni internazionali, presenziando nelle fiere più rilevanti del settore, in Europa con l'ISH a Francoforte, il Salone internazionale dei Bagno all'interno del Salone del Mobile, Cersaie di Bologna, in Russia a Mosca con la fiera MosBuild, in Asia dal BIG 5 di Dubai all'Indonesia ed alla Malesia, in America con il Kitchen and Bath negli Stati Uniti e in Canada l'INDEX e molte altre in tutto il mondo.

Oltre alle manifestazioni fieristiche, diversi sono i progetti in tutto il mondo contraddistinti dai prodotti de La Torre.

Arricchendo le sale bagno di grandi centri turistici, prestigiosi hotel e residenze, i nostri articoli conquistano terre estere e diventano ambasciatori della filosofia della nostra azienda oltre frontiera.

Ecco alcuni esempi.

ENG

Every year we plan a number of international actions and business trips. We regularly participate to the most relevant shows like ISH Frankfurt, il Salone del Mobile Milan, Bologna Cersaie, MosBuild Russia, Kitchen and Bath US, Index Canada, Big 5 Dubai and the more in other Countries. Additionally our products, being installed in some luxury hotels or residential units in different corners of the world, contribute in the best way to make our Company known and appreciated worldwide.

La Torre Green models are the result of a long experience acquired through the years and can be considered as examples of the progresses of technological applications for a healthier and more sustainable water distribution. An affordable move in the right direction for everyone.

FR

Chaque année, on organise une agenda de nos engagements internationaux, la participation aux foires de secteur les plus importants en Europe (ISH à Francfort, le Salon International de Bath au Salone del Mobile à Milan, Cersaie à Bologna, en Russie à Moscou avec mosbuild) en Asie avec le BIG 5 à Dubai en Indonésie et en Malaisie, en Amérique, au Royaume-Uni, Canada et dans beaucoup d'autres dans le monde entier.

Il ya aussi nombreux projets d'hôtels et résidences prestigieuses dant tous le Continents ou produits memes deviennent des ambassadeurs de la philosophie de notre entreprise à l'étranger.

Technical drawing of the G3/4 ENTRATA INLET. The drawing includes a top view showing a rectangular unit with dimensions 310 (width) and 270x593 (length). A side view shows a height of 70. A front view shows a vertical panel with four circular inlets, each with a diameter of 150, and a total height of 510. A detail view shows a single inlet with a G1/2 connection and a diameter of 85. A side view of the inlet shows a height of 260 and a diameter of 50.

Technical drawing of the rear view of the handle. The drawing shows a central vertical shaft with a horizontal grip section. Two mounting brackets are attached to the sides of the grip section. Dimensions are indicated: a total height of 213, a distance of 150 ± 22 between the centers of the mounting brackets, and a width of 176 at the base of the grip section.

INSTALLAZIONE SCATOLA DA INCASSO

- 1- Creare nella parete l'alloggiamento per contenere la scatola (1) rispettando l'altezza, lunghezza e profondità della medesima.
 - 2- Collegare i tubi dell'acqua calda e fredda ai rispettivi ingressi, del rubinetto e collegare i tubi di uscita.
 - 3- Togliere il cartoncino (2) e fare la prova di tenuta del rubinetto, facendo uso del tappino (3) per sfiatare l'impianto.
 - 4- Mettere a bolla la scatola con la livella (y) e fissare tutto con cemento rapido.
- NB. In caso di montaggio su pannelli in legno o cartongesso utilizzare le apposite asole poste agli angoli estremi della scatola, fig. 2 per il fissaggio con viti.

- 1- Create the housing in the wall to contain the box (1) respecting the height, length and depth of the same.
 - 2- Connect the hot and cold water pipes to the respective inlets of the tap and connect the outlet pipes.
 - 3- Remove the cardboard (2) and make the leak test of the tap, using the cap(3) to vent the system.
 - 4- Level the box with the level (y) and fix everything with quick cement.
- NB. In case of installation on wooden or plasterboard panels use the appropriate buttonholes at the extreme corners of the box, fig. 2 to fix with screws.

- 1- Créer le logement dans le mur pour contenir la boîte (1) en respectant la hauteur, la longueur et la profondeur de celle-ci.
 - 2- Connecter les tuyaux d'eau chaude et froide aux entrées respectives du robinet et raccorder les tuyaux de sortie.
 - 3- Retirer le carton (2) et faire le test d'étanchéité du robinet, en utilisant le bouchon (3) pour ventiler le système.
 - 4- Nivelier la boîte avec le niveau (y) et fixer avec du ciment rapide.
- NB. En cas de montage sur des panneaux en bois ou en plâtré, utiliser les boutonnières appropriées aux coins extrêmes de la boîte, fig. 2 pour fixation avec des vis.

- 1- Con della colla apporre la membrana (4) alla parete facendola aderire bene intorno alla scatola (1).
- 2- Intonacare e posare le piastrelle tenendo presente il limite max. indicato sulla scatola.
- 3- Con un cutter tagliare il profilo della scatola eccedente.
- 4- Chiudere l'acqua dell'impianto idrico.
- 5- Svitare le viti (w) per togliere il rocchetto falso (7), con l'apposita chiave togliere il tappo (6) dal corpo rubinetto (3).

- 1- Stick the casing (4) to the wall with glue closely encircling the box (1).
- 2- Plaster and tile minding the limits indicated on the box.
- 3- With a cutter cut the exceeding profile of the box.
- 4- Close the water of the plant
- 5- Unscrew the screws (w) to remove the fake spool (7), remove the cap(6) from the tap body (3) with the proper key

- 1- Fixez la membrane (4) au mur avec de la colle en la faisant bien adhérer autour de la boîte (1).
- 2- Posez des carreaux considérant le niveau maximum indiqué sur la boîte.
- 3- Avec un cutter profilez la boîte de l'excès
- 4- Fermez l'eau du système d'eau.
- 5- Dévisser les vis (w) pour retirer la fausse bobine (7), retirer le bouchon (6) du corps de robinet (3) avec la clé de mesure

MONTAGGIO E MANUTENZIONE

- 1- Montare il rocchetto (10) e fissarlo con le quattro viti (w), facendo attenzione che le ORing (8) siano poste in sede.
 - 2- Avvitare il deviatore (9) al corpo (5), quindi procedere con il montaggio rispettivamente nell'ordine: bussola (12), cartuccia (11), ghiera (13), cappuccio (14) e piastra (15).
- NB. Per il ricambio della cartuccia (11): togliere il cappuccio (14) svitare la ghiera (13) ed estrarre la cartuccia.

- 1- Assemble the spool (10) and fix it with the four screws (w), making sure that the ORings (8) are correctly located
 - 2- Screw the diverter (9) onto the body (5), then proceed with assembly in the following order: bush (12), cartridge (11), ring nut (13), cap (14) and plate (15).
- NB. To change the cartridge (11): remove the cap (14) unscrew the ring nut (13) and remove the cartridge.

- 1- Assembler la bobine (10) et la fixer avec les quatre vis (w), en s'assurant que les ORing (8) sont correctement placées.
 - 2- Visser l'inverseur (9) sur le corps (5), puis procéder au montage dans l'ordre suivant: douille (12), cartouche (11), bague (13), capuchon (14) et plaque (15).
- NB. Pour changer la cartouche (11): enlevez le capuchon (14), dévissez la bague (13) et retirez la cartouche.

INFO TECNICHE

THE WATER LABEL	P. 362
AERATORI	P. 363
CARTUCCE TRADIZIONALI	P. 365
CARTUCCE TERMOSTATICHE	P. 367

THE WATER LABEL

Una efficace iniziativa di certificazione volontaria.

A simple, effective industry backed voluntary initiative.

Une efficace certification volontaire.

Un facile schema di lettura, l'etichetta mostra in modo chiaro il consumo di acqua massimo del prodotto.

The simple classification scheme applicable throughout Europe, the label clearly shows maximum volume of water that the product will deliver.

Une étiquette simple e claire pour montrer le débit du produit.

I produttori di articoli sanitari possono dare il loro contributo alla costante ricerca da parte dei governi di ridurre il consumo e lo spreco di acqua, realizzando nuovi ed avanzati prodotti che combinino risparmio e confort per l'utente.

Bathroom manufacturers across the globe are aiding governments in their quest to reduce water consumption by producing new, exciting, innovative and technologically advanced bathroom products that deliver the bathing experience which consumers can enjoy.

Les producteurs du monde des sanitaires peuvent aider à réduire le gaspillage d'eau, étudiant des produits de plus en plus avancés conjugant confort pour l'utilisateur et épargne.

È anche disponibile un database di prodotti sanitari che se, installati e usati correttamente, contribuiscono a ridurre il consumo di acqua, energia e denaro.

The Scheme provides easy access to a database of bathroom products, when installed and used correctly, will use less water, save energy and save money.

Une liste des produits sanitaire avec caracteristiques appropriés pour une économie d'eau est aussi disponible.

AERATORI

L'ACQUA È IL "PETROLIO" DEL VENTUNESIMO SECOLO. Quest'espressione indica in modo chiaro quanto l'acqua potabile sia divenuta talmente scarsa da essere ritenuta un bene prezioso e anche sempre più costoso. La Torre sostiene un uso responsabile dell'acqua applicando ai propri miscelatori lavabo e cucina degli aeratori che limitino il flusso, consentendo di risparmiare acqua ed energia. Anche nei paesi in cui l'acqua è abbondante, un controllo del flusso è importante soprattutto relativamente al consumo di acqua calda, dove si riesce anche ad ottenere risparmio energetico e riduzione di emissioni di CO₂.

WATER IS THE OIL OF THE 21ST CENTURY. This figure of speech makes it clear that drinking water is becoming increasingly scarce and therefore more valuable all over the world. La Torre encourages responsible management of drinking water with its products that save both water and energy. After all, contrary to general opinion, it also makes sense to save water in countries that are abounding in water: hot water offers the greatest saving potential, requiring a great deal of energy to heat it. Every saved liter of hot water therefore saves energy and reduces CO₂ emissions. Maintaining comfort while going easy on the environment.

L'EAU EST LE "PÉTROLE" DU XXIE SIÈCLE. Cette expression indique clairement que l'eau potable est devenu précieux, et aussi de plus en plus cher. La Torre soutient l'utilisation responsable de l'eau en appliquant à leurs mélangeurs des aérateurs qui limitent le flux d'eau et permet aussi une économie d'énergie. Même dans les pays où l'eau est abondante, un contrôle de flux est particulièrement important par rapport à la consommation d'eau chaude, pour réaliser des économies et de réduction des émissions de CO₂.

Gli aeratori vengono utilizzati in tutti i nostri prodotti per lavabo, bidet e lavelli cucina, il getto aerato è confortevole, riduce la rumorosità e permette di mantenere i consumi entro limiti internazionali.

Aerators can be found in all kitchen and lavatory faucets. They shape the water stream, reduce faucet noise and fulfil national norms. This means they help save water and energy.

Aérateurs sont utilisés dans la quasi-totalité de nos produits pour lavabo, bidet et évier cuisine, donnant un jet aéré est confortable, réduisant le bruit autant qu'ils maintiennent le débit dans les limites internationales.

Quanta acqua si può risparmiare?

Non è facile quantificare esattamente il risparmio d'acqua che si ottiene soprattutto perché il consumo senza componenti limitatori varia a seconda della pressione dell'impianto, dalle condizioni delle condutture e da altri fattori esterni. Quando si applicano i regolatori di flusso le variabili vengono pressoché annullate. Come indicazione di massima se prendiamo un tipico lavandino in un paese europeo con un aeratore standard che porta circa 13 l/m adottando un aeratore con limitazione di portata a 7 l/m si ottiene un risparmio di circa il 60%.

How much water can you save?

It is even more difficult to calculate the exact savings one can expect by using water-saving products for the washbasin, shower or elsewhere. One important factor is of course the flow rate prior to retrofitting a water-saving device. With flow-restricting products, this rate changes whenever the line pressure changes.

Taking a typical Western European washbasin with a standard aerator (flow rate approx. 13.0 l/min) as the baseline, you can expect savings of up to ~60% when switching to a 7 l/min aerator.

Combien d'eau pouvez-vous économiser?

Il est difficile de quantifier exactement l'économie de l'eau qu'on peut obtenir, principalement parce que la consommation sans composants limitant varie en fonction de la pression du système et d'autres facteurs externes. A titre indicatif, si l'on prend un lavabo typique dans un pays européen avec un aérateur standard qui apporte environ 13 l/m, en adoptant un aérateur Neoperl avec limitation de débit à 7 l/m on réalise une économie d'environ 60%.

CARTUCCE TRADIZIONALI

ITA

La fabbricazione della ceramica (l'anima della cartuccia) e la produzione della plastica 100% made in UE garantiscono il controllo delle principali fasi della produzione. Qualità ottima. Controlli di diverse fasi effettuati su tutti i processi della fabbricazione, dai test sui prototipi prima della produzione fino al prodotto finito: tutte le cartucce vengono controllate una ad una prima di lasciare la fabbrica.

La produzione della ceramica si basa essenzialmente sul principio dello stampaggio, ma per le forme geometriche speciali si usa anche il metodo ad iniezione, usufruendo dei vantaggi di tale tecnologia.

Dischi di ceramica: i dischi di ceramica fatti dai migliori materiali europei accuratamente selezionati vengono controllati al 100% con una macchina automatica di controllo ottico (AOI) dal punto di vista delle superfici, della densità, della geometria e delle misure.

Questi controlli tecnici sono effettuati durante tutto il processo di fabbricazione per la rugosità superficiale, la planarità e per la superficie di tenuta. Questi dati sono molto importanti per la realizzazione della cartuccia dal punto di vista della tenuta, della coppia di serraggio e della durata durante l'uso. Il grasso utilizzato nelle nostre cartucce è accuratamente scelto e testato per le

principali normative.

Per quanto riguarda le parti in plastica: la precisione delle misure dipende in gran parte dalle macchine automatiche ad iniezione e dal rigido controllo finale.

Controllo finale: dopo il montaggio ogni cartuccia viene controllata con una pressione pneumatica per verificarne la tenuta. Il controllo ad aria è molto più sensibile di quello ad acqua. Dopo aver passato il test, la cartuccia viene marchiata con un numero, in base al quale la cartuccia può essere sempre identificata.

Analisi di laboratorio: oltre ai controlli pneumatici effettuati sul 100% delle cartucce vengono fatti anche altri tipi di analisi in laboratorio, in base alle prescrizioni delle norme internazionali. Tali test riguardano per esempio la resistenza a differenti pressioni e temperatura, e test riguardanti i cicli e la forza dei movimenti della cartuccia per verificarne la durata e la morbidezza nel tempo.

Le nostre cartucce soddisfano le richieste delle normative internazionali, e possiedono le più importanti certificazioni come la EN, NF ASME/CSA, ASSE, GB, e le parti in contatto con l'acqua sono approvate dalla DVGW, WRC, NSF, ACS e ASNZS4020. Tutti i nostri modelli standard possiedono le normative NSF.

ENG

The production of the ceramic and of the plastic we use is 100% made in Europe, which gives warranty of strict control of the most important production phases. The lubricating grease we use is selected to comply with international norms.

The ceramic components are generally forged, save in case of particular shapes requiring the injection system. The ceramic disks are made of the best quality European materials and they are automatically checked by a AOI electronic control system for smoothness of surface, size, density and dimensions.

Technical controls are constantly repeated during all the production cycle with particular care about the quality and exactness of the surfaces, to make sure our cartridges will give best performance in coupling, water tightness and life.

As for the plastic components, their precision is granted by the advanced technological level of our machines.

There is of course a final control by air and a serial number is then printed on the cartridge for easy identification. In addition to the individual pneumatic control on each cartridge we randomly test our cartridges in our laboratories according to the strictest international rules regarding pressure resistance, life cycles, movement, durability.

Our cartridges comply with international regulations and

NSF International

are certified ENM NF, ASME/ CSA, ASSE, GB. Parts in contact with water are certified DVGW, WRC, NSF, ACS, ASNZS4020. All our standard items conform to NSF.

FR

la fabrication de la céramique et de la plastique 100% Européenne, garanti le contrôle des principales étapes de la production. Le lubrifiant utilisé dans nos cartouches est soigneusement choisi et testé selon es principaux règlements internationaux excellente qualité. Contrôles sont effectuées pendant tous les processus de fabrication, du prototype avant la production au produit fini: toutes les cartouches sont vérifiés une par une avant de quitter l'usine.

La production des disques céramique est effectuée surtout par pressage, mais pour des formes géométriques particulières, nous utilisons également la méthode d'injection, en profitant des avantages de cette technologie.

disques en céramique: Les disques en céramique fabriqués à partir de meilleurs matériaux européennes soigneusement sélectionnés, sont contrôlées à 100% avec un contrôle optique automatique (AOI) relativement à la surface, la densité, la géométrie et les mesures

Ces contrôles techniques sont effectués tout au long du processus de fabrication pour assurer précision de la cartouche du point de vue de la fermeture, le couple de serrage et de la durabilité lors de l'utilisation.

concernant les pièces en plastique: la

précision des mesures s'obtient grace au niveau technique très élevé des machines.

Vérification finale: chaque cartouche est vérifiée par pression d'air pour vérifier les fuites. Le contrôle de l'air est beaucoup plus sensible que de l'eau. Après avoir passé le test, la cartouche est identifiée par un numéro, pour être toujours tracée.

En plus des tests de contrôle pneumatiques sur 100% des cartouches, d'autres tests s'effectuent en laboratoire, selon normes internationales relativement à la pression, la température, et puis tests concernant les cycles et la force des mouvements de la cartouche et la durabilité

Nos cartouches ont les certifications les plus importantes telles que EN, NF ASME / CSA, ASSE GB, et les parties en contact avec l'eau sont approuvés par DVGW, WRC, NSF, ACS et ASNZS4020.

CARTUCCE TERMOSTATICHE

ITA

Tecnologia VERNET:

Vernet ha realizzato la cartuccia termostatica CA43 ottimizzando l'elemento termostatico e il design dei componenti di regolazione per fornire il meglio della performance e della sicurezza secondo gli standard più esigenti: NF EN1111 (marque NF077), ASSE1016, NHSDO8, ...

Una sagoma per una vasta gamma. Cartucce con differenti standard e diverse portate per le diverse applicazioni (doccia, vasca, termostatico centralizzato, alte e bassa pressioni, alte portate) con una sola sagoma.

Escursione termica standard: 15-60°C (59-140° F)

Materiali anticalcare: un polimero termoplastico specifico per minimizzare l'aderenza del calcare.

Sicurezza: ogni cartuccia viene testata individualmente per verificare la limitazione di temperatura massima.

ENG

VERNET technology:

With a specially optimised thermostatic element and a highly advanced design of the regulation components, Vernet has developed the CA43 cartridge to give you the best temperature regulation and safety in accordance with various standards, NF EN 1111 (marque NF077), ASSE1016, NHS DO8, ...

One geometry for a wide range. A wide range of cartridges with various regulation standards and flow capacities for your different needs (shower, bath, central thermostat, high and low pressure, high flow) with one single geometry.

Standard temperature range: 15-60°C (59-140°F).

Specific temperature ranges are available upon request.

Anti-Limescale: a high technology thermoplastic polymer is used to minimize limescale adherence.

Safety: the anti-scald function is individually checked on each cartridge.

La technologie VERNET:

Vernet a réalisé la cartouche thermostatique CA 43 en optimisant l'élément thermostatique et la conception de composants de contrôle pour fournir les meilleures performances et la sécurité selon normes les plus exigeantes: NF EN1111 (marque NF077), ASSE1016, NHSDO8, ...

Un modèle pour un large éventail d'applications. Cartouches à différentes caractéristiques pour différentes applications (douche, baignoire, thermostatique centralisé, haute et basse pression en entrée, haut débit) avec une seule forme.

Régulation de température standard: 15-60 ° C (59-140 ° F).

Matériaux anti-calcaire: un polymère thermoplastique spécifique afin de minimiser l'adhérence du calcaire.

Sécurité: chaque cartouche est testée individuellement pour vérifier la limitation de la température maximale.
