SETA

A scene lighting design with backward atmosphere light.

A circular wall light with a backward atmosphere is designed for scene lighting, effectively illuminating the wall and enhancing the overall lighting experience. The ADC12 aluminum alloy shell ensures excellent heat dissipation, while the glass material used for the luminous surface offers higher light transmittance and minimal loss. The shell surface can also be customized to seamlessly blend with any decorative style, catering to individual preferences. With an IP65 waterproof rating, this lamp is suitable for various outdoor applications such as sidewalks, yards, corners, corridors, stairwells, reception areas, meeting rooms, pillars in open plan offices, business streets, landscapes, gardens, parks, and more; it can also be used indoors for functional illumination and atmospheric displays.

RANURA

A Cylindrical Wall Light Effectively Projects Light to Cover a Wide Area.

The Ranura is a cylindrical wall light that provides versatile illumination, projecting light upwards, downwards, and forwards to effectively cover a wide area. It features white translucent PC covers at both ends for uniform and soft lighting. The lamp body shell is made of ADC12 aluminum for efficient heat conduction and excellent heat dissipation performance, ensuring stable operation and an extended lifespan. Widely applicable in various indoor and outdoor settings such as sidewalks, facades, entrance areas, corners, corridors, stairwells, reception areas, meeting rooms, pillars in open plan offices, yards, business streets, landscapes, gardens, parks, etc.

BAMBÚ

A Cylindrical LED Wall Light With Upward and Downward Lighting.

The Bambú wall light has a cylindrical design with two illuminated surfaces: one for primary lighting and the other for supplementary lighting, both emitting conical light spots. It is made of ADC12 aluminum, ensuring excellent heat dissipation. The main lighting end of the lamp body extends to form a reflective cover, resulting in soft and bright light output that enhances the beauty of the light spot. Bambú lamps are widely used in corners, corridors, stairwells, reception areas, meeting rooms, pillars in open plan offices, business streets as well as indoor and outdoor spaces.

PASTILLA

A sleek and durable wall light, offering a simple yet sophisticated solution for creating a pleasant ambiance in any setting.

This versatile series of wall lamps can be surface-mounted or embedded to cater to diverse installation requirements. It features an ADC12 aluminum alloy housing that ensures efficient heat dissipation and long-lasting performance. The design of the Pastilla aligns with the current trend of green energy conservation, guaranteeing minimal light pollution. Available in round and square shapes, users have flexibility to choose according to their preferences and specific circumstances. Whether it's sidewalks, yards, corners, corridors, stairwells, reception areas, meeting rooms, pillars in open-plan offices, business streets, landscaped gardens, parks, or other indoor or outdoor environments - the Pastilla is perfectly suited for all.

Mounting

Candelabro

A pole-top light consists of pole-mounted ceiling lights with multiple heads and combinations.

Candelabro features an ultra-thin disc lamp holder combined with various light poles in different shapes. Each lamp holder has a luminous flux of 1000lm, allowing for the combination of 1 to 4 or more lamp holders. The height of the lamp pole typically ranges from 2.4m to 3.5m, making it suitable for outdoor areas like courtyards, sidewalks, parks, industrial parks, gardens, commercial streets, and campuses. Candelabro not only provides superior lighting but also showcases a frosted glass surface that ensures gentle and comfortable illumination while effectively reducing light pollution by minimizing upward light emission and preventing disturbance to residents.
